Subject: RE: Northstar Power Outage

Gentlemen,

As you are all aware, we have completed our power outage and WMECO repair project that began yesterday afternoon. I am pleased to report that we did not miss a beat and completed all necessary procedures for the switch over to the generators and switch back to WMECO successfully.

On behalf of Northstar and the management team, I would like to thank you and your team for your services and support during this 2 day project- it is really nice to work with a group of professionals to complete this project.

Thank you again - have a nice weekend,

Despina
